News Release

FOR IMMEDIATE USE BEFORE SEPTEMBER 26, 2018

**Avantor® to Exhibit at Medtec China 2018, Showcase
NuSil™ Brand Biocompatible Silicone Adhesives**

*Adhesive technologies and other solutions help medical device manufacturers improve
production processes and device performance*

Radnor, Pa. (USA) – September 18, 2018 – [Avantor®](#) today announced it will showcase its [NuSil™](#) brand biocompatible silicone adhesive technologies at Medtec China 2018, September 26-28 in Shanghai, China. The technologies help medical device manufacturers improve their production processes and device performance.

Technology experts will be in Booth B109 to discuss the full range of high-purity NuSil [silicone adhesives](#) and provide information to device manufacturers to allow them to evaluate and select the right type of silicone adhesives for their applications. The NuSil adhesives product group includes one- and two-part room temperature (RTV) and high temperature vulcanizing (HTV) formulations. A wide range of NuSil primers is also available to increase adhesion to different substrates during the manufacturing process.

"Silicone adhesives can be formulated numerous ways to accommodate adhesion, substrate compatibility, performance characteristics and cure profiles," said Anthony Feng, Vice President, Biomaterials. "Given the possible variations in adhesive formulations and application demands, NuSil's customization capabilities provide options for specific device designs and manufacturing process requirements."

In addition to silicone adhesive technology, Avantor will highlight several other NuSil solutions including [lubricious silicone](#) materials and in situ cure technology for silicone elastomers.

Visit www.NuSil.com to learn more about NuSil brand silicone adhesives and materials.

About Avantor

Avantor® is a global manufacturer and distributor of high-quality products, services and solutions to professionals in the life sciences and advanced technology industries. As our channel brand, VWR offers an integrated, seamless purchasing experience that is optimized for the way our customers do business. Operating from over 30 countries worldwide, the company seeks to enable customer success in the biopharmaceutical, pharmaceutical, medical device,

diagnostics, healthcare, educational, industrial, government, aerospace & defense, and semiconductor industries. For more information visit www.settingscienceinmotion.com.
