News Release

FOR IMMEDIATE USE BEFORE SEPTEMBER 26, 2018

Avantor® to Showcase Expertise in Single-use Technology at ISPE Boston 2018

Experts to present customized novel fluid sampling systems for single-use GMP operations

Company to exhibit its wide range of standard and customized products

Radnor, Pa. (USA) – September 19, 2018 – [Avantor®](#) will showcase its expertise in single-use technology at the annual [ISPE Boston Product Show](#), September 26 at Gillette Stadium in Foxboro, Mass. The ISPE Product Show is the flagship event for the Boston Area chapter of the International Society for Pharmaceutical Engineering.

Afternoon Technical Presentation

Timothy Korwan, Director of New Product Development and Commercialization, and Tat Yuen, Product Development Engineer, will deliver a technical presentation, "[Designing Novel Fluid Sampling Systems for GMP Operations](#)," at 4:30 p.m. during the show's educational session on *Optimizing Facilities Through Innovation & Technologies*.

The presentation will highlight the Avantor OmniTop product, a patented conical tube cap design, and a novel multi-tube sampling platform that was customized to replace traditional sampling tools and processes. It will also cover various design considerations for a customized single-use system, methods used to validate a system, and pre-use integrity tests that verify the efficacy of each system on a batch-to-batch basis.

"Some production processes are limited in what solutions they can use off-the-shelf," says Korwan. "Customized platforms can help a customer ensure that critical fluid samples are taken aseptically to reduce the possibility of inaccurate test results, and reduce waste by taking a much smaller sample size when compared to other sampling methods available."

VWR, part of Avantor, offers a range of standard and customized single-use solutions through its [channel and e-commerce site](#).

Avantor's Exhibit and Career Table

Avantor experts will also be available all day in booth E97 to discuss the company's range of standard and customized single-use products for the full spectrum of upstream, downstream and fill and finish applications.

In booth C6, Avantor representatives will be on-hand to discuss engineering, manufacturing and entrepreneurial scientist career opportunities for students, graduates and prospective employees.
